

OIL COMPANIES  
FILE REPORTSReady Response Made to  
Call for Information on  
Organization.

Austin, Tex., Sept. 12.—Approximately 1500 oil companies operating in Texas have been listed by the railroad commission and responded to the call for information as to plan of organization and other data relative to the affairs of such companies, according to C. R. Gilmore, member of the commission who has immediate charge of the enforcement of the laws affecting oil companies.

This information is now available to the stockholders of these companies and already a number of inquiries have been received for information. Commissioners Gilmore still insists that all of the oil companies operating in Texas have not as yet made such reports as is required under the new law, and these are urged to do so before being penalized.

Another call will shortly be issued by the commission for such information, and if the call is not heeded, drastic action may be resorted to.

## TO DRILL 4000 FEET.

Whitney, Hill county, Tex., Sept. 12.—The Whittier No. 1 of Hill county is situated near here has been spudded in and is now drilling with an 18 inch hole in order that they may reach the 4000 foot level as soon as possible. The well is to be drilled to 4000 feet unless oil in paying quantities is found at a lesser depth.

Only A Few More  
Days Left

Just one week from tomorrow, Monday, September the 22nd, will mark the passing of one of the greatest opportunities ever offered the buying public. This may seem like a long time to you, and you may think, "Oh, well, I have lots of time to send in my order for Delta stock." And you are right, for a good many things can happen in eight or nine days. But had you ever thought of this: Our allotment of the Delta Oil Company stock may be over-subscribed long before that date arrives. That is probably one of the things you had not taken into consideration. We are not trying to excite you and cause you to invest in this stock unless you have fully decided that you wish to make an investment with these people. If you will think for a moment, you will remember we have never told you that any of the investment propositions which we were handling were going to advance without their advancing just as we had told you they would.

We have kept faith with you and we know that if you will follow our advice in regard to your oil investments, we will make big money for you. We have never advised a client wrong yet, and we have been in business too long to begin now.

## You, Of Course, Know

That The Delta Oil Company pays a monthly dividend of five per cent?  
That they have been paying this dividend regularly for several months?  
That their earnings are increasing every month?  
That they are expecting to increase this monthly dividend to at least ten per cent?  
That they have 260 acres in the Oklahoma Oil Fields with sixteen producing wells and 45 more proven locations to drill.  
That they own a very valuable tract in the heart of the Burk Burnett oil fields where they will commence the drilling of a well immediately?  
That this tract is completely surrounded by gushers only a few hundred feet away?  
That they own more than 11,000 acres of oil and gas leases in Oklahoma and Texas?  
That regardless of the fact that this is one of the younger oil companies, it has enjoyed a phenomenal success, which is evidenced by the fact of their monthly dividends?  
That the Delta Oil Company is an incorporated company—not a trust organization?  
That the capitalization of this company is only \$100,000.00 with a par value of \$1.00 per share?  
That we are offering a limited amount of this stock at \$1.50 per share until September 22nd, at which time the prices will advance to \$2.50 per share?  
You Must Act Now. We cannot hold this stock for you. If you want to get a small amount of this stock, we urge that you send in your subscription at once. You can't delay.

Wire your subscription or give your order to your broker.

New Sand Found  
At 1200 Feet In  
A Shallow Field

Ajax Company Brings in  
Well Equal to Its First  
3500 Gusher.

Wichita Falls, Tex., Sept. 12.—The No. 2 Lamber of the Ajax Oil company has been completed. No estimation has yet been made of the production, but the drillers state that the well is as good a one as the No. 1 which was brought in with a production of 2400 a few weeks ago.

South of Burk Burnett in the very heart of the old shallow field, a new pay sand has been encountered at a depth of 1200 feet by the Ajax Oil and Refining company of Dallas. In the early days of the old field, shallow production in this part of the field was brought from 150 and 200 feet depths. The Texoma well which was the first to find the new strata, is producing about 50 barrels per day and is situated on the Peyton farm. In the old Burk Burnett field and in the northwest extension production has been coming from around 1500 to 1800 feet, except the shallow wells, such as those in the vicinity of the Texoma well.

## WELL IS SPUDDED IN.

Chillicothe, Tex., Sept. 12.—Five miles west of Chillicothe, the El Paso Oil company has spudded in its well. Every geologist who examined this location states that the formation at this site is one of the best in the state.

Good Progress  
Reported In Tom  
Green County

Texas Drilling Syndicate's  
Well Is Now at Depth  
of 1660 Feet.

San Angelo, Tex., Sept. 12.—Good progress is being made in the wells in Tom Green county. The following is the conditions of wells now drilling near San Angelo:

The Texas Drilling Syndicate of Wichita Falls is boring at a depth of 1660 feet on the ranch of the Harris brothers of San Angelo, 25 miles north of here in Coke county.

The San Diego and Texas Oil company has resumed drilling on its well on the T. J. Clague ranch, above Carlsbad in Tom Green county. Operations were closed down when a stem was broken in the hole. After borrowing one from a neighboring company's well, which was shut down, drilling was started again. The well is now drilling at around 1300 feet.

On the Door Key ranch the White-side Oil and Gas company is still financing.

Operations are at a standstill at the York, pending the arrival of Charles Paltow, one of the associate owners of the well. The hole is now 200 feet deep. This well is situated near Childress.

Oil in small quantities has been found at a depth of 45 feet on the Mc Carley Oil association's well on the Ed Douthett ranch, in Sterling county. Drilling is being forward rapidly and at present the depth of the well is about 250 feet.

## COMPANY LEASES 50,000

## ACRES IN LOUISIANA FIELD

Shreveport, La., Sept. 12.—The Gladys Oil Oil company has leased 50,000 acres of Louisiana oil lands and will operate on a wholesale scale. James A. Cook, state manager of the company, announced. The property was purchased for approximately \$100,000.

Much of the land is wildcat land, 20,000 acres being in Caliburno Parish, 2,000 in the De Soto field, and 18,000 in Union Parish.

Operators have more faith in Union Parish now than they had before the company purchased this land.

## SECRECY MAINTAINED ABOUT

## WELL IN MERKEL FIELD

Ahlens, Texas, Sept. 12.—Seven miles northwest of Merkel, the Security Banking and Investment company of Fort Worth, encountered an oil well. According to the operators of this well oil is within 100 feet of the surface. The well is being drilled to a depth of 150 feet. The well is being drilled to a depth of 150 feet. The well is being drilled to a depth of 150 feet.

## TEXAS PETROLEUM COMPANY

## TO DRILL EAST OF CLEBURNE

Cleburne, Texas, Sept. 12.—A derrick is being erected on Mrs. J. C. Freeman's farm near Stubbards, east of Cleburne, by the Texas Petroleum Products company. It is the purpose of the company to sink a well on this site at once.

## GIANT

Today's Gigantic Opportunity  
CONSIDER:

- 1.—GIANT is an oil company of small capital and big holdings—a fair square exploration project.
- 2.—GIANT has 18,000 acres in the heart of the Texas Panhandle.
- 3.—GIANT properties are right on the extended line of the north-tendency of the Ranger and Burk Burnett wonder wells.
- 4.—GIANT is located close to the great Hargess and Masterson groups of wells yielding from six to thirty million cubic feet of gas daily.
- 5.—GIANT will drill deep.

## GAS AND GOLD

GIANT will drill. If it gets oil a few shares of this stock will be worth a fortune, but even if it doesn't drill to get oil, it is practically certain to get gas. The Panhandle area is well gas with gas wells, so we will get the gas from the well. It is fairly deep gas wells and gas wells in liquid gas and there is an unlimited demand for it.

## 25 A SHARE

You can buy as little as a dollar's worth and the limit is not set. It is a big chance. Single shares have made poor men millionaires. If we get oil, our 18,000 acres will be worth more than \$100,000. It is a chance. Don't delay. Wire your reservation. Send your check immediately today. We will send you a CLIP THIS AD AND SEND YOU FREE MAP.

THREE FIELDS  
TO BECOME ONE

Northern Pools Already  
Connected by Many Pro-  
ducing Wells.

Ranger, Tex., Sept. 12.—That the Ranger-Desdemona-Stephens fields will finally be connected in the current belief in Texas oil circles. At the present time the two northern pools are practically connected by good producing wells, while south of Ranger developments indicate that it will not be a long time before that connection is complete.

The Magnolia Petroleum company's completion of Monday opened up considerable new territory between Ranger and the Stephens county line. This well is situated on the Marshall Collins lease just across the line in Stephens county north of Ranger and is producing around 200 barrels per day, furnishing another connecting link between the Ranger and Stephens fields.

## Well Makes 1200 Barrels.

In the Pleasant Grove church district of the Ranger pool, the Gulf Production company has almost completed its C. L. Perkins No. 2. The well is now making 1200 barrels daily from the top of a lime formation. The Harrison No. 2 of Chapman et al in the southwest part of the Ranger district is making 500 barrels of oil daily from the lower sand, extending to the 2445 foot level.

The Gulf Production company's ward No. 1, north of Breckenridge is drilling in. As yet no estimate has been made of the production.

On the J. E. Baruch Texas Pacific Coal and Oil company has completed its No. 12 at a total depth of 2455 feet. No estimate has been made of the production. It is believed that this well will produce as much oil as the other wells on the tract.

## Fishing For Lost Baller.

Southeast of Ranger the S. P. Mc Glothlin well, which was almost ready for a shot, is now fishing for a lost baller. A few weeks ago this well made 200 barrels, but soon quit flowing and now it looks as though the oil came from a pocket. At present there is not a well producing in the immediate neighborhood of this well. The Sinclair Gulf Oil company is drilling at a depth of 2300 feet in the B. L. Danley No. 2. The drill is now about 15 feet from the bottom with no showing of oil or gas.

## REPORTS INDICATE MUCH

## ACTIVITY IN JACK COUNTY.

Jacksboro, Texas, Sept. 12.—The status of drilling operations in the vicinity of Jacksboro, Jack county, Texas, follows:

The Bennett Oil corporation has a finishing job in its 24 inch hole at 251 feet on E. J. Baruch, some five miles from Jacksboro.

McKenna, J. W. Knox No. 1, located on the famous Knox terrace, near the center of the Patrick Osborn survey, two and three-fourths miles east of Jacksboro, resumed operations today and is setting 20-inch casing at 420 feet.

Cosden Oil and Gas company, Cherrylholmes No. 1, on the northeast corner of the Erwin survey, north of Jacksboro, penetrated the black lime at 2800 feet, setting casing at 2840 feet and expects to drill the well in one day.

Cosden Oil and Gas company, Victor Stewart No. 1, northwest corner Texas Consolidation survey and company survey, 15 miles northwest of Jacksboro, 2525 feet, repairing derrick.

Southern State Oil company, Cherrylholmes No. 1, center of G. & B. N. survey No. 4, eight miles east of Jacksboro, drilling at 1300 feet.

Hutson & Jackson, Lindsay estate No. 1, southeast corner Jeano N. Wright 440 acre survey, a half mile north of Jacksboro, shut down at 1010 feet.

Frontier Oil and Gas company, David Lindsay No. 1, west central part of Isaac N. Wright 1420 acre survey, nine miles north of Jacksboro, derrick just completed.

S. R. Felt, Dr. J. Younger No. 1, south of Wood county school land survey, 14 miles north of Jacksboro, drilling around 1000 feet.

Great Plains Oil and Gas company, Green, Brown No. 1, center of T. E. & L. company survey No. 2720, 2711 feet. Two gas sands were encountered in the most any six feet deep in the bottom of the hole and one six feet deep above this. The gas from this well will be sold to the Consumers' Light and Power company and will be of great help in preventing a shortage of gas during the coming winter.

The Texas company's Dillard No. 1, in section before-2-2, is producing 500 barrels of oil from a sand encountered at 2025 feet. The production of this well is increasing. The oil is coming from an upper sand.

## CONSERVATION OFFICER SAYS

## NO WASTE IN DUKE OIL FIELD

Jacksboro, Texas, Sept. 12.—No unwarranted waste of oil in the Duke field is occurring, according to J. I. McWhorter, conservation officer of the railroad commission. McWhorter is spending the greater part of his time studying the Wichita Falls district's condition and is his belief that it will be late in November before the Duke field will be at Burk Burnett and in the new Wagoner pool are capable of running all the water that can be produced in that district.

## DRILLING TO BE RESUMED

## IN WELL IN COKE COUNTY

San Angelo, Texas, Sept. 12.—In Coke county, near Tenney, a small quantity of oil and gas has been found in the Schumacher & Co. well on the J. W. Westbrook ranch. The oil lies on the water which fills the 2565 foot cone. Eight and a fourth inch casing is being rethreaded preparatory to being set to the bottom of the hole. Drilling will be resumed during the week when the water is shut off.

## BELL COUNTY HAS TWO

## WELLS AT 1000 FEET

According to a Belton, Texas, report, Bell county has two wells, the Melou well and the Warewell well of the K-B Oil company. The Melou well is about 1000 feet. The Warewell well is about 1000 feet. The Melou well is about 1000 feet. The Warewell well is about 1000 feet.

## SEARS WELL SHOWS OIL.

A report is that the Sears well of the Securities Banking and Investment company, of Fort Worth, located in southern Jones county, Texas, northwest of Abilene, and nine miles north of Merkel, was showing for oil at about 2500 feet, on just touching an oil sand. The nearest production to this well is in the Ranger field. The same company's Hand well, two and a half miles west of Merkel, is reported down 1500 feet and is gassing with a small showing of oil.

## To the Investing Public:

During the past few months the above company has been carefully planned, quietly launched and successfully put over. In the circular letters issued heretofore to our stockholders, and published in the preceding issues of this paper, we have outlined in compact and brief form the achievements and progress of the company since its organization.

Today we have under lease 315 acres of land in the Northwest Central Texas fields, all of which has been chosen with the single view of securing production. We today own four complete strings of tools and several complete strings of casing. Our Woods No. 1 is practically completed, being now in the limestone with only about 150 feet to the main oil sand. Our Woods No. 2, on the same tract, has been spudded in and work is being started on our No. 3 well in the Desdemona field. In stating that we expect to have four wells completed and producing oil by January first, we do not feel that we over estimate our ability.

We are today one of the strongest financial institutions in the Southwest, and as an illustration of our strength and work outlined for the immediate future, would state in passing that during the last three weeks we have ordered \$100,000.00 worth of casing. With production already secured, with a very large cash fund in reserve, and with our valuable leases already acquired, to say nothing of those under consideration, we feel that an investment in the stock of this company now is second to none in the Southwest.
